### Experience

#### Frontend Mobile Developer (React Native) | El Sol N.E.C

Medellín, Colombia | Jan 2026 – Present

- I participated in the development of the mobile application's frontend using React Native and TailwindCSS, contributing to the construction of components and interface structure.
- I implemented responsive UI interfaces, ensuring compatibility and correct display on different devices and screen sizes.
- I assisted in the implementation of styles and layouts focused on improving the user experience and usability of the application.

#### Software Developer Intern | Invamer S.A.S.

Medellín, Colombia | Jan 2025 – Aug 2025

- Collaborated with the Solutions and IT Team in the development of the internal system "Central Empleados", designed for the Human Resources department to optimize employee management processes
- Built dynamic UI components and modules such as Home, File Upload, Document Viewer, and Job Position Forms.

### Education

#### Systems Engineer, University ITM, Medellín

February 2023 – Present
